

Willard Packaging Co.

Serving the
Mid-Atlantic region
for over 50 years

Since 1962 Willard Packaging has continuously expanded the selection and value of its offerings to become a premier provider of custom packaging design, manufacturing, and shipping supplies in the Mid-Atlantic Region. Our diversified product mix includes custom boxes, displays, custom foam, custom case interiors, and related packaging supplies.

A partnership with Willard isn't just about buying packaging. It's about building a relationship with a knowledgeable, trusted, committed source; adding value to your business and actively contributing to your success.

Our facility incorporates over 100,000 square feet, over 80 employees and a fleet of trucks serving our customer's demanding needs.

Case Divison

willardpackaging.com

Willard's in-house Design Team will offer you an innovative solution for your case from the inside out, giving careful attention to many factors: the weight and fragility of your product, the shock and vibration shipments will impose, the most efficient use of the case's interior space and how the case will be used at it's destination.

Willard Packaging case divison serves the following industries and product lines:

- Aerospace Equipment
- Electronic & scientific instrumentation
- Audio & Video
- Firearms
- Broadcast & Communications
- Consumer Product
- Medical & Pharmaceutical
- Sales Demonstrations
- Military & Government Agency
- OEM & Industrial
- Sales & Marketing
- Trade Shows

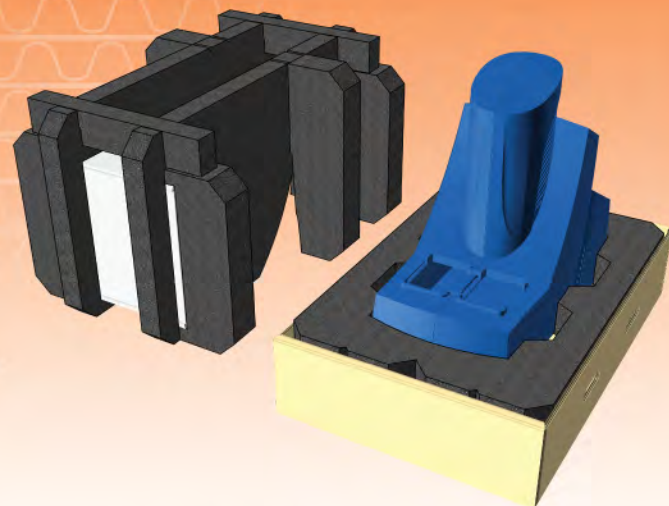

In-House Design Services

Our experienced design department can handle any packaging requirement and is helpful in making suggestions or answering questions regarding the use of transit cases, foam or corrugated products. With the utilization of the latest CAD/CAM equipment we are able to produce accurate product samples and drawings. We are also able to provide you a 3-D virtual prototype that you are able to rotate, zoom and even print. We encourage our customers to take advantage of this service as the proper design in the beginning can prevent numerous problems and excessive cost later on.
